Woertz's Flexible Connectivity System (FCS)

Woertz offers a ***Flexible Connectivity System (FCS)*** that uses a combination of Insulation Displacement technology and pluggable terminal blocks. This system provides rapid connections and expandability for power and data buses in industrial and commercial applications.

Our flexible power buses can handle up to 70 Amps in flat cables with 2-7 conductors. The data bus cables are available as shielded and unshielded for 2 and 4 wire field bus applications which include CAN, LON and EIB.

Please visit www.woertz-usa.com to view data sheets or request literature. Telephone: (215) 997-8855
